*In a series of phone exchanges, initiated by the Examiner telephoning to have applicant file the Terminal Disclaimer over the art of record; Applicant thereafter indicated it was e-filed. The Examiner also indicated that due to SEQ ID NO: 9 being a fragment of a known peptide bound to many agents (as found in the updated search), Applicant would need to amend the transition phrase to "consisting of" SEQ ID NO: 9 to overcome such art. The Examiner also requested that Applicant identify where the agent is to be bound to SEQ ID NO: 9 (e.g. N-, C-terminus or both, or side chain?), based on support.*

**Part III.**

☐ It is not necessary for applicant to provide a separate record of the substance of the interview, since the interview directly resulted in the allowance of the application. The examiner will provide a written summary of the substance of the interview in the Notice of Allowability.  
☒ It is not necessary for applicant to provide a separate record of the substance of the interview, since the interview did not result in resolution of all issues. A brief summary by the examiner appears in Part II above.
